

# BUILDINGPLAQUES.COM

## Communicate the design elements that earn LEED® certification.

Let visitors know the elements of your design that earn LEED certification, both showcasing the design and educating the public about LEED.

## Lower cost / faster design time than custom signage.

Your plaque will be designed in minutes and shipped in weeks.

## Sustainable materials / processes.

buildingplaques.com utilizes sustainable materials and printing methods. Designed for permanence, our plaques will not need to be replaced. If replacement is desired, the materials are 100% recyclable.

## Sustainability

### MATERIALS

Designed for permanence, our LEED® Recognition Plaques will not need to be replaced. If replacement is desired, all materials are recyclable. The plaques are constructed of solid (one-piece, no laminates or adhesives used) architectural grade aluminum and attached to a variety of surfaces using steel stand-offs. All materials are REACH and RoHS compliant, and emit no VOCs or off-gassing.

### IMAGING PROCESSES

We offer plaques imaged through two-processes, depending upon the requirement for both appearance and durability.

- + Ink jet printed color plaques (indoor only) are imaged with water-based inks that are UV-LED cured. UV-LED curing provides a strong bond to the aluminum, but requires minimal curing energy.
- + Photographic black-and-white (indoor or outdoor) plaques are imprinted by sealing the image inside of the aluminum. This process results in an extremely durable, high resolution image without using the chemicals required to create signs of similar durability, like etching.

Both plaques are resistant to damage or scratching and can be cleaned with any neutral cleaning agent (or water).

## Our Products

### FULL COLOR PLAQUES

- + Intended For Indoor Installation
- + Portrait or Landscape Orientation
- + Two Sizes: 23" x 35" or 18" x 24"

### BLACK & WHITE PLAQUES

- + For Outdoor or Indoor Installation
- + Portrait or Landscape Orientation
- + Two Sizes: 23" x 35" or 18" x 24"
